TITLE: Resident/Intern/Fellow Summative Evaluations	POLICY NUMBER:	S/P-03	
DEPARTMENT: Graduate Medical Education	Effective Date: 07/01		
	Revised:	08/22	
	Reviewed:	08/22	
	Date of next Review:	08/24	

POLICY:

A mechanism must be in place to assess each residents'/interns'/fellows' ("resident(s)") performance throughout the program, both verbally, face to face, and in writing and utilizing the results to improve resident/intern performance.

PURPOSE:

Interactive evaluation and feedback process for residents to address resident and faculty concerns that produces an accurate assessment of residents competence in patient care, medical knowledge, practice-based learning and improvement, attitudes, interpersonal relationships and communication skills, professionalism, and systems-based practice.

PROCEDURE:

- The Program Director/or designee shall evaluate the resident verbally in a face-to- face meeting and in writing, at periodic intervals, not less than semiannually, consistent with his/her training schedule. All programs must have program policies related to resident evaluations that ensure all accreditation requirements are met. . Mid-Year and End of Year Summative Evaluations must be documented on the attached institutional forms.
- 2. The above written evaluations must be available to the resident, for review to enable him/her to assess his/her progress. This will allow the resident the opportunity to personally assess and improve performance. Residents shall be encouraged to review their evaluation files regularly.
- 3. The Program Director/or designee on a regular basis shall review the written periodic evaluations (not less than quarterly). The Program Director must provide a final evaluation for each resident who completes the program (See S-12 Final Resident/Intern/Fellow Evaluation).
- 4. If a deficiency is identified, a written individual remediation plan will be developed and agreed upon by the Program Director and Resident/Intern.
- 5. When unable to resolve the deficiency, refer to the Due Process policy.

6. Evidence of multi-source evaluations of the residents and resident evaluation of the rotations must be available for ACGME/CPME program inspection.

Approved by:

Randall Schlievert, MD

Vice President, Academic Affairs and Research, Mercy Health - Toledo
